📄 SUMMARY

Detail-oriented Data Analyst and AI/ML enthusiast with expertise in Python, SQL, Power BI, Advanced Excel, and Web Scraping. Skilled in data cleaning, preprocessing, EDA, dashboard development, and data visualization. Experienced in transforming raw data into actionable insights and supporting data-driven decision-making through analytics and business intelligence solutions.

🧠 SKILLS

- Python
- SQL
- Power BI
- Advanced Excel
- Web Scraping
- Data Analysis
- Data Cleaning & Preprocessing
- Data Visualization
- Machine Learning
- Deep Learning
- Natural Language Processing (NLP)
- Generative AI
- Feature Engineering
- Statistics & Probability
- MySQL
- Git & GitHub
- Problem Solving & Analytical Thinking

📖 COURSES

📊 Data Science & AI/ML (Grade : A)

Red & White Skill Education

08/2024 – Present | Surat, Gujarat

- Data Science combines computer science, mathematics, statistics, and AI to analyze large amounts of data.
- It helps organizations extract meaningful insights from raw data.
- Data scientists identify patterns and trends to support decision-making.
- Data Science is used to predict future outcomes and business opportunities.

📁 PROJECTS

📊 Data Analytics Projects

📊 Super Store Sales Analysis Dashboard 🔗

Excel

- Improved an interactive dashboard using pivot tables, slicers, and charts to analyze sales data.
- Performed data cleaning and transformation to ensure accuracy and consistency.
- Identified key insights including top-performing regions, customer segments, and revenue trends.

🏦 Bank Analytics Dashboard with Data Cleaning 🔗

Power BI

- Built a multi-page Power BI dashboard analyzing accounts, loans, and transaction data.
- Performed extensive data cleaning using Power Query and created KPIs using DAX.
- Enabled business insights through interactive visualizations and customer segmentation.

🛒 Flipkart Mobile Price Scraper 🔗

Python (Scraping)

- Scraped mobile product data from Flipkart using Python and BeautifulSoup.
- Cleaned and processed data using Pandas for analysis.
- Analyzed product prices and ratings to generate insights.

🛒 Supermarket Sales Analysis 🔗

Python (EDA)

- Conducted exploratory data analysis (EDA) using Pandas, NumPy, and Seaborn.
- Cleaned and processed raw data to extract meaningful patterns and trends.
- Initiated visualizations to analyze customer behavior, sales distribution, and revenue patterns.

EDUCATION

Bachelor of Science in Information Technology (B.Sc. IT)

Vidhyadeep University

07/2023 – 05/2026 | Surat

CGPA: 7.96

Higher Secondary Certificate (HSC) – Commerce

GHSEB

2023 | Junagadh

PR: 96.43

Secondary School Certificate (SSC)

GSEB

2021 | Junagadh

PR: 90.20

LANGUAGES

English

Hindi

Gujarati

AI-Powered Face Attendance System

Machine Learning

- Developed a face recognition-based attendance system for automated attendance tracking and secure report generation.
- (Python, CNN, OpenCV, TensorFlow, Streamlit)

Crypto Investment Advisor PRO

Machine Learning

- Built a crypto analytics dashboard for real-time market tracking, trend analysis, volatility detection, and investment insights.
- (Python, Streamlit, Pandas, Plotly, Time-Series Analysis)

AgriShield AI

Deep Learning

- Built an AI-powered agricultural monitoring system to detect crop health issues, analyze field data, and generate smart farming recommendations for improved yield prediction.
- (Python, TensorFlow, YOLO, BERT, GPT, Computer Vision, Streamlit, OpenCV)

NLP Resume Analyzer

Natural Language Processing

- Built an AI-based resume analyzer using NLP to extract resume data, match job description keywords, calculate ATS scores, and generate optimization suggestions and give preparation questions.
- (NLP, Claude Sonnet 4 API)

Generative AI Workflow Project

- Built a Generative AI workflow with use of N8N and Data tools technologies.
- Utilized AI tools (e.g., ChatGPT/Gemini) for content generation and automation.
