

Mit Umaretiya

Data Science & Ai/ML Practitioner

 GitHub  LinkedIn  Portfolio  mitumaretiya29@gmail.com  91+ 9638012273

 Surat, Gujarat

Summary

A detail-oriented **AI/ML Enthusiast** and **Data Analyst** with a strong foundation in **Machine Learning, Deep Learning, Natural Language Processing (NLP)**, and **Generative AI**, along with experience in building **AI model workflows** and **business intelligence** solutions. Proficient in **Python, SQL, Power BI**, and **Advanced Excel** for developing predictive **dashboards**, performing **data analysis**, and generating actionable insights. Experienced in **data cleaning, data preprocessing, feature engineering**, and exploratory data analysis (**EDA**), with a strong focus on solving real-world problems using data-driven approaches.

Skills

- **Programming & Query Languages:** Python, SQL, C++, C
- **Libraries & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Plotly
- **Data Analysis & Processing:** Data Cleaning, Exploratory Data Analysis (EDA), Data Transformation, Data Modeling, Feature Engineering, KPI Tracking
- **BI & Analytics Tools:** Power BI (DAX, Power Query, Data Modeling), Advanced Excel (Pivot Tables, XLOOKUP, Dashboards)
- **Databases & Platforms:** MySQL, SQL Server, Git, GitHub, VS Code
- **Mathematics for AI/ML:** Linear Algebra, Probability, Statistics, Hypothesis Testing
- **Machine Learning:** Supervised Learning (Regression, Classification), Unsupervised Learning (Clustering, Dimensionality Reduction), Model Evaluation (Accuracy, Precision, Recall), Data Preprocessing
- **Deep Learning:** Artificial Neural Networks (ANN), CNN, RNN, Model Training Concepts
- **Natural Language Processing (NLP):** Text Processing, Tokenization, Basic NLP Techniques
- **Generative AI:** AI flows, N8N, Fundamentals of Generative Models, Prompt Engineering, AI Tools Usage
- **Computer Science Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Statistics, Business Intelligence
- **Soft Skills:** Problem-Solving, Analytical Thinking, Communication, Team Collaboration, Adaptability

Courses

Data Science & AI/ML Red & White Skill Education

08/2024 – Present

Surat, Gujarat

Data science is a field of study that uses computers math, statistics and artificial intelligence study massive amounts of data to gain actionable business insights. Data scientists can provide important insights into past events as well as their causes future projections, as well as possible actions to take by finding patterns and trends. Businesses can gain an competitive edge, enhance their processes, and take informed decisions based on these insights.

- English
- Hindi
- Gujarati

Projects

Data Analytics Project

Super Store Sales Analysis Dashboard — Excel

- Developed an interactive dashboard using pivot tables, slicers, and charts to analyze sales data.
- Performed data cleaning and transformation to ensure accuracy and consistency.
- Identified key insights including top-performing regions, customer segments, and revenue trends.

Bank Analytics Dashboard with Data Cleaning — Power BI

- Built a multi-page Power BI dashboard analyzing accounts, loans, and transaction data.
- Performed extensive data cleaning using Power Query and created KPIs using DAX.
- Enabled business insights through interactive visualizations and customer segmentation.

BMW Car Dashboard with Data insights — Power BI

- Built an interactive Power BI dashboard for BMW sales and inventory analysis.
- Used DAX and Power Query for KPI creation and data transformation.
- Created dynamic reports to track sales trends and model performance.

Supermarket Sales Analysis — Python (EDA)

- Conducted exploratory data analysis (EDA) using Pandas, NumPy, and Seaborn.
- Cleaned and processed raw data to extract meaningful patterns and trends.
- Created visualizations to analyze customer behavior, sales distribution, and revenue patterns.

AI / ML Projects

Machine Learning Projects

- **AI-Powered Face Recognition Attendance System**  - Developed a face recognition-based attendance system for automated attendance tracking and secure report generation. (*Python, CNN, OpenCV, TensorFlow, Streamlit*)
- **Crypto Investment Advisor PRO**  - Built a crypto analytics dashboard for real-time market tracking, trend analysis, volatility detection, and investment insights. (*Python, Streamlit, Pandas, Plotly, Time-Series Analysis*)

Deep Learning Projects

- **AgriShield AI**  - Built an AI-powered agricultural monitoring system to detect crop health issues, analyze field data, and generate smart farming recommendations for improved yield prediction. (*Python, TensorFlow, Computer Vision, Streamlit, OpenCV*)
- **Multi-Modal AI Image Assistant**  - Developed a multimodal AI application for image understanding and contextual question answering with voice input and chat-based interaction. (*Python, Streamlit, PIL, Image Processing, Conversational AI*)

Natural Language Processing (NLP) Project

- **NLP Resume Analyzer**  - Built an AI-based resume analyzer using NLP to extract resume data, match job description keywords, calculate ATS scores, and generate optimization suggestions and give preparation questions. (*NLP, Claude Sonnet 4 API*)
- **Multi-Text Classification System**  - Built an NLP-based text classification system to classify multiple text inputs into categories like sports, technology, politics, finance, and medical using machine learning-based prediction. (*Python, TF-IDF, Linear SVM, Streamlit, Scikit-learn*)

Generative AI Workflow Project

- Built a Generative AI workflow with use of N8N and Data tools technologies.
- Utilized AI tools (e.g., ChatGPT/Gemini) for content generation and automation.

Education

Bachelor of Science in Information Technology (B.Sc. IT), Vidhyadeep University
CGPA: 7.96

07/2023 – Present

Higher Secondary Certificate (HSC) – Commerce, GHSEB
PR: 96.43

2023

Secondary School Certificate (SSC), GSEB
PR: 90.20

2021
